Date: January 6, 2023

Re: Opinion Dynamics Review of 2023 Adjustable Savings Goals Analysis

Per Section 6.2 of the Illinois Energy Efficiency Policy Manual Version 2.1,¹ Illinois gas utilities are to adjust their energy savings goals on an annual basis to:

- Align them with annual updates to the Illinois Statewide Technical Reference Manual (IL-TRM)
- If applicable, reflect annual updates to net-to-gross (NTG) ratios covered by the Policy Manual NTG collar policy²

In addition to these annual adjustments and irrespective of the NTG collar policy, prior to the start of the first Plan Year of an approved Plan, gas utility annual energy savings goals will be adjusted for the entire plan period to align with the most recently recommended NTG ratios available.

Independent evaluators are to review these adjustments to verify that they have been performed correctly.

As the independent evaluator for Ameren Illinois Company (AIC), Opinion Dynamics reviewed the 2023 adjustable savings goals workbook generated by Applied Energy Group (AEG) for AIC's 2023 Natural Gas Portfolio. This workbook memorialized and described adjustments made to AIC's natural gas goals for 2023 based on updates made in IL-TRM V11.0.

Opinion Dynamics reviewed this workbook. Based on this review, Opinion Dynamics verifies that the prescribed adjustments to the gas energy savings goals for 2023 have been performed correctly.
