

ComEd MT Status Report

Rick Tonielli - ComEd

May 22, 2023

Retail Products Platform

- 2022 evaluation process completed
- Preparation underway for expert judgement panel intended to:
 - Gain additional insights into retailer decision-making
 - Pursue outstanding research questions
- Energy Solutions is now program implementation contractor, taking over from NEEA
- Considering options for improving program performance, potentially including:
 - Adding additional appliances to ComEd participation
 - Participating retailers are interested in HPWH- promising overlap with electrification efforts
 - Increased interaction with retailers
 - Improved coordination with ComEd retail rebates program

Electric Homes New Construction

- Establishment of working group to pursue EHNC as a market transformation initiative.
- Research recommended pursuing EHNC as a single initiative, rather than looking at independent enabling technologies (i.e. heat pumps) separately
- Initial tasks will include:
 - Development of logic models and Market Progress Indicators
 - Development of natural market baseline
- Many issues to think through in terms of influence on market
 - Overlap with codes/standards activity
 - Impact of federal funding for electrification
 - Impact of other ComEd programs focusing on electrification, such as:
 - Contractor training
 - Financial incentives
 - Lots of synergy but complicated to judge impact of individual actions
