

Nicor Gas Energy Efficiency Program - Plan Year 2025
Quarterly Report: First Quarter (January 1, 2025
through March 31, 2025)
Response to Evaluators' Recommendations

APPENDIX B

Program	PY	Recommendation	Action Completion Date	Action(s) Taken
Small Business		Measures: Furnace, >92% AFUE Recommendation 1. The program should revisit and document the calculation methodology for direct high-efficiency furnaces. Ensure that product technical specifications are correctly sourced and applied and that savings input in the tracking data adequately reflect the claimed savings calculation.		Nicor Gas has adjusted the calculation for high-efficiency furnaces.
	2023		3/1/2025	
Small Business		Measures: Combination Oven Recommendation 6. Ensure the IL TRM default values are correctly applied to ex ante savings calculations for Combination Oven measures.		Nicor Gas updated the values for savings calculations in this measure.
	2023		1/27/2025
