

Nicor Gas Energy Efficiency Program - Plan Year 2026
Quarterly Report: Second Quarter (April 1, 2026
through June 30, 2026)
Response to Evaluators' Recommendations

APPENDIX B

Program	PY	Recommendation	Action Completion Date	Action(s) Taken
Smart Neighborhood Builder	2025	Measures: Storage Water Heater Recommendation 1. Ensure the tracking input parameters such as storage water heater kBtu capacity, first-hour rating, and size are verified when applying deemed TRM baseline values to ensure the correct UEF baseline values are calculated for each storage water tank.	6/30/2026	Nicor Gas has increased QA QC to ensure first-hour rating and capacity inputs are being passed in the program data.
Home Energy Savings	2025	Measures: Duct Sealing Recommendation 1. Ensure the "GrossAnnualThermSavings" column in the "Measures" tab of tracking data is populated for all measures, where participation is reported.	6/30/2026	Nicor Gas has increased QA QC to ensure savings are being populated for duct sealing measures.
Income Eligible Single Family	2025	Measures: Domestic Hot Water Pipe Insulation Recommendation 1. Ensure that tracking data is consistent with units and scale.	6/30/2026	Nicor Gas has updated the measure requirements to be consistent in unit and scale within Pipe Insulation instances.
Income Eligible Single Family	2025	Measures: Basement Sidewall Insulation Recommendation 3. Ensure R-value added Above Ground input is included in the tracking data.	6/30/2026	Nicor Gas has increased QA QC to ensure the R-value input for savings is populated.
Income Eligible Multifamily	2025	Measures: Air Sealing Recommendation 3. Ensure the ISR applied in savings calculations for all air sealing measures reflects the program delivery method.	6/30/2026	Nicor Gas has updated the ISR value for air sealing to align with the program delivery method
Income Eligible Multifamily	2025	Measures: Basement Sidewall Insulation Recommendation 8. Ensure that inputs used in savings calculations for Basement/Sidewall Insulation are reported in the tracking data.	6/30/2026	Nicor Gas has increased QA QC to ensure the R-value input for savings is populated for basement sidewall insulation measures.
Income Eligible Multifamily	2025	Measures: Furnace Tune Up Recommendation 13. Ensure that deemed inputs recorded in the tracking data for Furnace Tune-ups are consistent with the values used in ex ante savings calculations and the IL-TRM v13.0.	6/30/2026	Nicor Gas has ensured the correct climate zone is being utilized in the savings calculations for furnace tune ups.
