

# Modern Measurement for Energy Efficiency

## Data-Powered Solutions for Utility Programs

Tim Guiterman, Director of Quantify Solutions

December 15, 2015

# SAG Proposal: Program Change

## Savings Measurement Software to support program operations

- Use commercially available technology to improve operations of existing programs & measures within programs, e.g.,
  - Home Performance programs
  - Smart Thermostat measure / HVAC programs
  - Small/medium business programs
- Through usage data analysis, gain insights that otherwise remain hidden
- Requires no installation of equipment

# Agenda

## Topics for discussion

1 EnergySavvy Overview

2 Savings Measurement Software

3 Optix Quantify Demo

4 Applications and Next Steps

# EnergySavvy Overview

Data-driven cloud solutions for utility DSM

optix ENGAGE

CUSTOMER  
ENGAGEMENT

optix MANAGE

PROGRAM AUTOMATION  
& PORTFOLIO TRACKING

optix QUANTIFY

MEASURE IMPACT  
AT THE METER

# Savings Measurement Software

# EnergySavvy Presentations

Savings Measurement Software at industry conferences

# Modern Measurement Gaining Attention

Two leading EE organizations announced papers TOMORROW

How Information and Communications Technologies Will Change the Evaluation, Measurement, and Verification of Energy Efficiency Programs

---

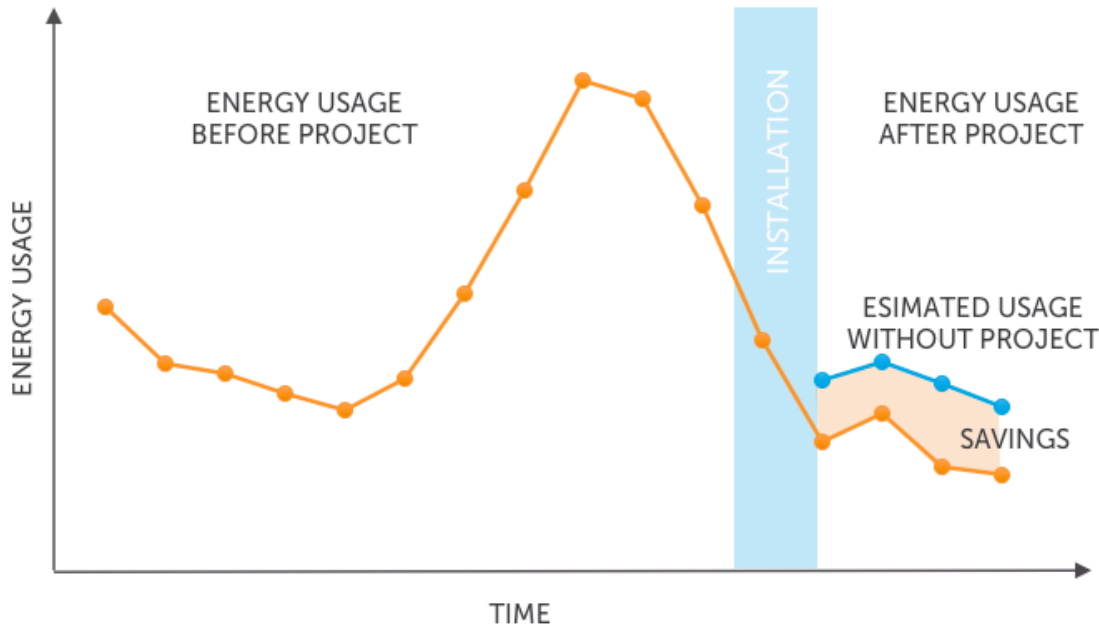

The Changing EM&V Paradigm, A Review of Key Trends and New Industry Developments, and Their Implications on Current and Future EM&V Practices

---

# Savings Measurement Software

Continuous and automated measurement, for all projects

Utilizes accepted M&V protocols

## Key outcomes

- More timely insight
- More granular insight
- Complements traditional evaluation

## What it is not

- Replacement for formal EM&V
- Right solution for all program types

# How It Works

Repeatable, transparent results

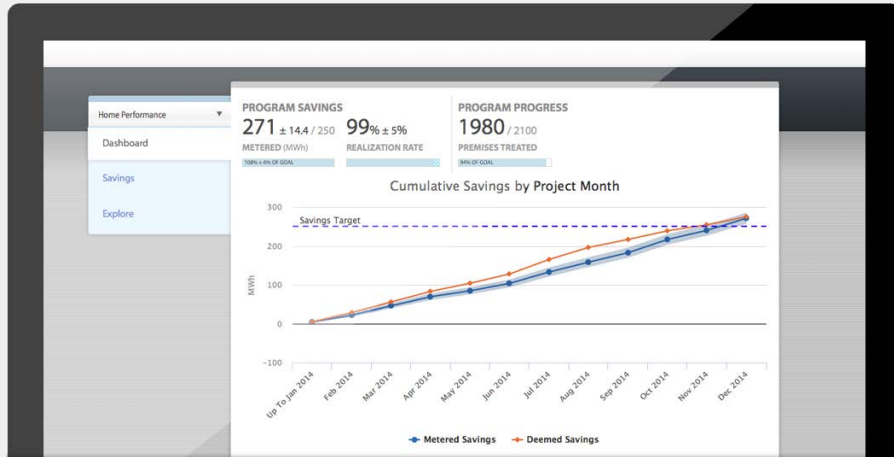

Build weather-normalized models for each customer

Compare changes in usage for treated customers vs. overall population

Repeat analysis for all customers with each new addition of data

Power Quantify solutions based on changes in customer energy usage

# Optix Quantify

## Key Features

- Faster results
- ⊕ “X-ray vision across a program”
- ▮ Program optimization
- 🔒 A host of data-powered solutions

## Use Cases

- Rank contractors based on actual savings results
- Identify top factors bringing up and down results
- Target QA/QC to outlier projects, not random
- Provide customer feedback on upgrade performance
- Analyze data to inform measurement process

## Sample clients

# Optix Quantify Demo

# Optix Quantify Product Snapshot

Experienced data analytics

## Data Analyzed

1+

Billion  
calculations

2.8

Million  
customers

48

Million  
usage data points

1

Million  
weather data points

## Results From

40,000 projects

105,000 measures

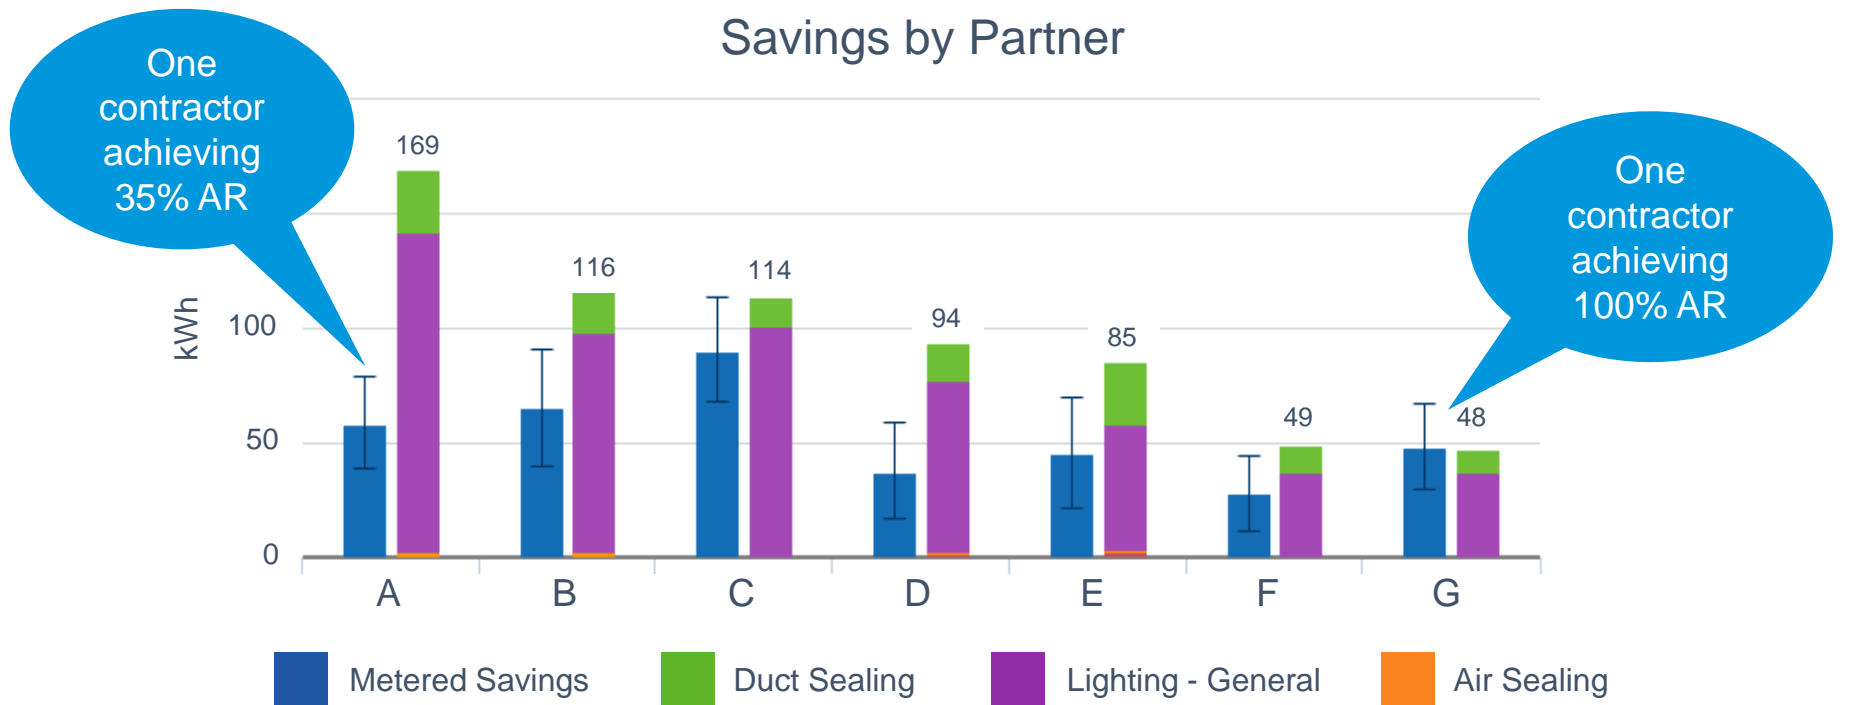

550 contractors

# Real World Applications

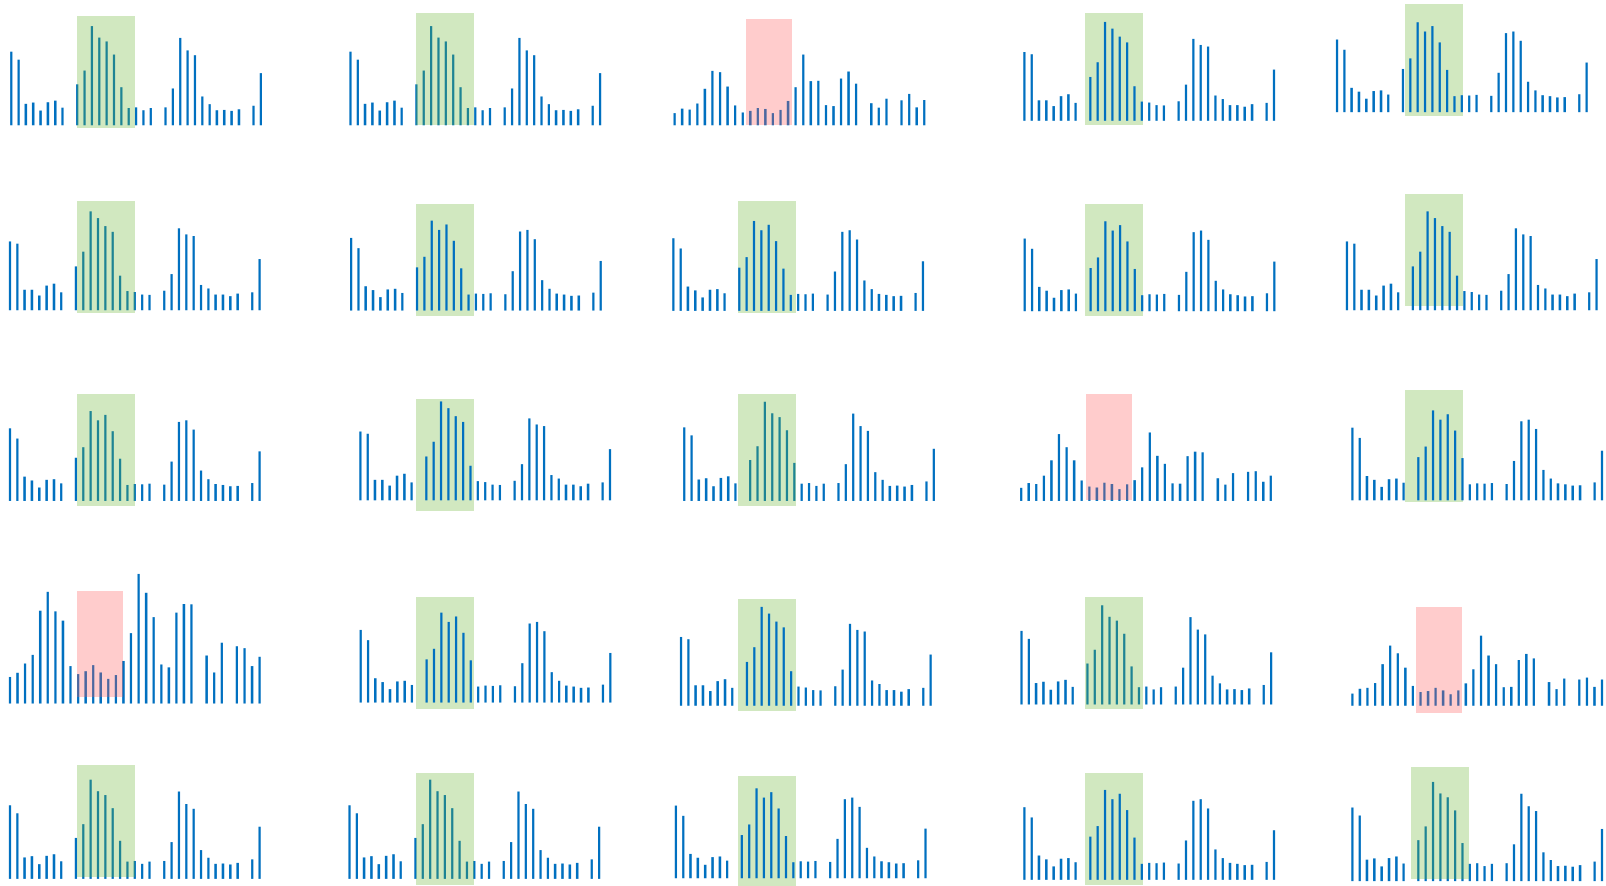

# Contractor Performance and Feedback

Comparing savings at the meter to expected savings reveals good, bad and ugly

# Intelligent QA/QC Targeting

Case Study: 13% of furnace replacements weren't replacing anything

# Intelligent QA/QC Targeting

Slipped through 3 levels of QA/QC before being identified by Quantify

Home with electric heating detected pre-treatment

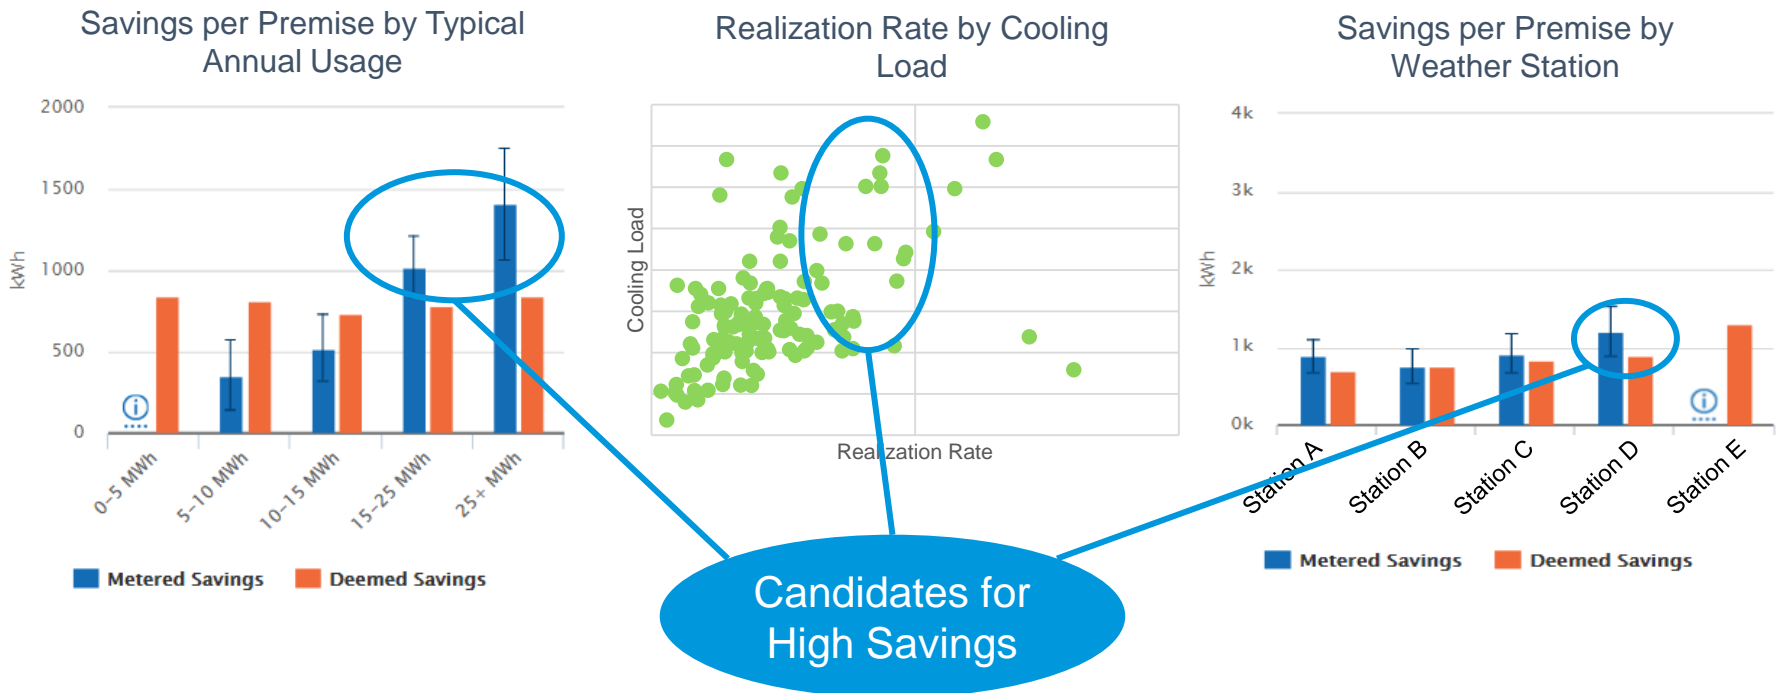

Home with no electric heating detected pre-treatment

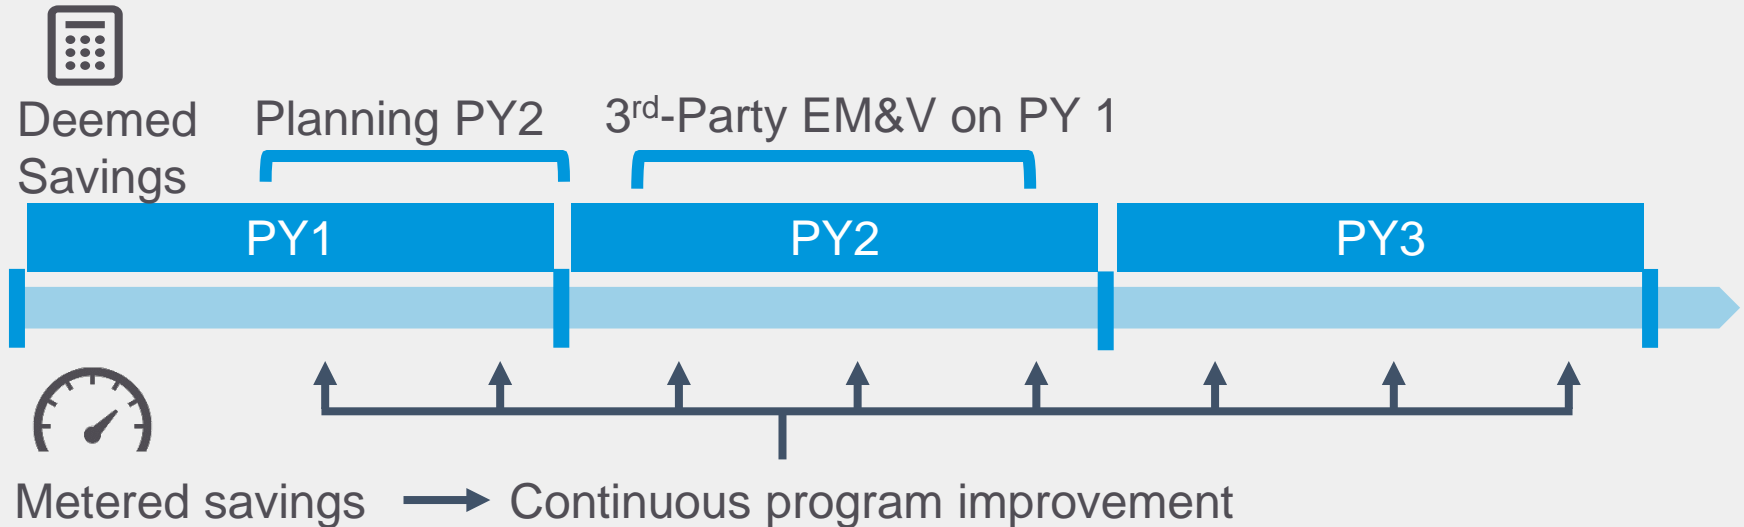

# Targeted Marketing

Case Study: Identify future program candidates based on performance of others

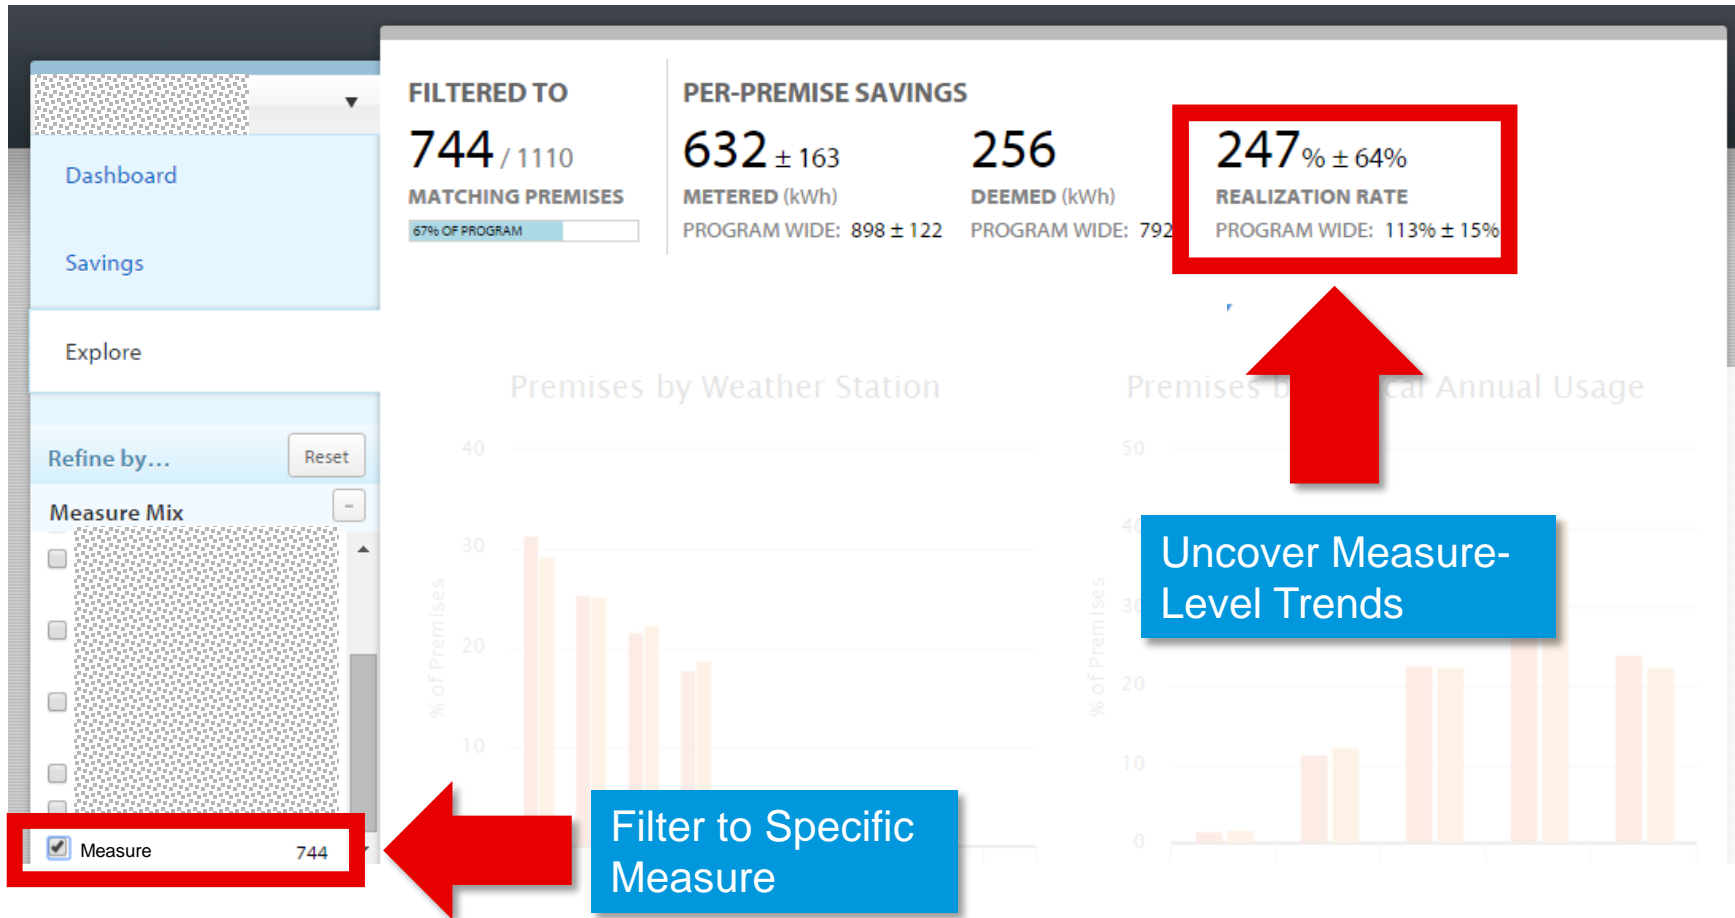

# Integrated Evaluation Support

Supports targeted research and sampling

# TRM Update Support

Collecting evidence to calibrate deemed savings

# Continuous Feedback Enables Continuous Improvement

What critical program insights can I discover in time to take action?

Monitor 100% of premises (treated and untreated) in real time

Timeliness of data makes it actionable

Quick feedback loop means lots of chances to iterate

Projects completed Jan – Mar:  
**44%**  
of deemed savings achieved

Projects completed Apr – Jun:  
**89%**  
of deemed savings achieved

# Pay for Performance

Creating a market for energy efficiency savings, reliably

## Procure EE “PPA” & Enable a Market

Bid out to meet savings targets

Define specifics or leave aggregators to innovate

Aggregators or implementers take risks, earn economic rewards

## Measure delivery for reliability

Quantify ensures customers’ get promised savings

Timely and trustworthy measurements make payout quick & reliable

Granular monitoring or all interventions ensures the utility retains control

## Learn and grow

Track what works and what doesn’t

Identify good and bad interventions and evolve offerings

Provide information to aggregators to improve delivery and build market

# For Discussion: Application in Illinois

Quantify as a savings measurement software tool to optimize programs

- Improve program performance for Home Performance, analyze Smart Thermostats, and improve Small and Midsize Business programs
  - ✓ Reduce QA/QC costs
  - ✓ Improve marketing effectiveness and targeting
  - ✓ Enhance measurement with meter data
  - ✓ Improve contractor performance
  - ✓ Deliver project feedback to customers
- Make use of AMI data
- More quickly review new measures/pilots – keep up with new tech

Thank You

**ENERGYSAVVY**
