INSULATED FLOATING POOL COVERS — Save 60-70% of your heating costs by using an insulated floating pool cover. Reduces water evaporation, chemical loss, energy costs, and will help keep your pool cleaner. Payback on most covers is less than one year. Each pool cover is custom designed and fitted to your pool dimensions and is priced per square foot.

The material varies by thread count in the polyethylene fabric. Each material gains bursting strength and abrasion resistance as the thread count increases. The hemmed edge is used for indoor pools and spas, or 1 piece outdoor covers. The weighted edge is used on outdoor pools to help prevent wind lift.
