Table of Standard Fixture Wattages

Appendix B: Table of Standard Fixture Wattages

The *2004 SPC Program Table of Standard Fixture Wattages* was generated under the following guidelines:

1. All fixtures must comply with Title 10 of the Code of Federal Regulations (same as CWT) as well as California's Title 24 Regulations; and
2. All fixtures using 4-foot or U-tube "standard" 40 W fluorescent lamps (F40T12 or FU40T12) are excluded, with the exception of equivalent "standard" high-output and instant-start fixtures. All fixtures with 8-foot "standard" 75 W lamps (F96T12) are excluded *as well as* all fixtures with 8-foot "high output" 110 W lamps (F96T12HO).

The motivation for the exclusion of these "standard" lamp fixtures is that most "cool-white" and "warm-white" general purpose lamps of the above types do not meet federal code (Title 10).

New codes that do not conform to these guidelines will not be added to the 2004 SPC Program table.

Lamp Type*for fluorescent fixtures*

A	"F25T12" type—25 watt, 4 ft, T12 lamp
B	T4, Instant Start
IL	T8, Instant start
L	T8, rapid start
E	T12, Energy efficient
EH	T12, Energy efficient, High output
EV	T12, Energy efficient, Very high output
P	T5, Instant Start
PH	T5HO, Instant Start
S	T12, Standard wattage
SH	T12, Standard, High output lamp
SV	T12, Standard, Very high output lamp
T	T10 lamp
WL	T8, Instant start, Energy saver

Ballast Type*for fluorescent fixtures*

L	electronic
S	Standard magnetic
E	Energy efficient magnetic

Configuration [letter]

T	Tandem wired fixture
D	Delamped fixture, i.e. some lamps Permanently removed but ballasts remain

Configuration [number]*for de-lamped fixtures*

Number signifies the total number of ballasts in the fixture: e.g. An "F42EE/D2" is an "F44EE" with two lamps removed so that there is one extraneous ballast.

for tandem wired ballasts

Number signifies the total number of lamps being run by the ballast: e.g. An "F42LL/T4" would indicate that a four-lamp ballast is wired to run two two-lamp fixtures.

with no preceding letter

Number indicates the number of ballasts in an ambiguous multiple ballast fixture: e.g. An "F43ILL/2" indicates a three-lamp fixture with two ballasts (as is often the case if there is A/B switching).

Ballast Light Output

R	Reduced light output
H	High light output
V	Very high light output
